Bloons Tower Defense 5

Tower Defense video game series featuring popping enemy balloons Bloons Tower DefenseThe Bloons TD logoGenre (s)Tower defenseDeveloper (s)Ninja Kiwi, Digital Goldfish Ltd. (iOS)Publisher (s)Ninja KiwiPlatform (s)Android, browser (Flash), iOS, macOS, Nintendo DSi, PlayStation Portable, Microsoft Windows, Xbox One, PlayStation 4, Nintendo SwitchFirst releaseBloons TDMid 2007This releaseBloons Adventure Time TDAU: July 14, 2018SEA: July 14, 2018WWW : August 28, 2018 Bloons Tower Defense (also known as Bloons TD) is a series of games to protect towers under the Bloons series and produced by Kiwi Ninja. The game was originally developed as a browser game built on adobe Flash platform and released in mid-2007. Later games in the series expanded to support a variety of mobile platforms, including Android, iOS, Windows Phone, PlayStation Portable and Nintendo DSi. In the game, players try to prevent balloons (called bloons in the game) from reaching the end of the established course by placing towers or road objects along it that can pop spots in different ways. Some towers can stop bloons and give other towers more time to pop their freezing and bonding bloons. Money appears bloons, completion levels, and the collection of bananas from existing farms that can be spent on new towers, upgrades for existing, or temporary items such as exploding pineapples and road spikes. Gameplay The main goal of Bloons TD is to prevent the balloons known in the game as Bloons from reaching the end of a certain track on the map, which consists of one or more inputs and exits for bloons. Game tower defense game and thus the player can choose different types of towers and traps to place around the track in order to protect against bloons by getting 1 dollar in the game for each layer of bloom popped up. If bloom reaches the end of the path, the player loses his life (or in later games, health); Once they are all exhausted, the game ends. The Bluns always follow the path of the map on the track until they reach the exit (s) or are moved to an earlier part of the track by the tower's ability. There are two classes of bloons in the game: regular (unnamed in the game) and MOAB-class. Throughout the Bloons TD 6, regular bloons consist of: red, blue, green, yellow, pink, black, white, lead, zebra, rainbow, purple, and ceramic drops. The moAB-class blues are in the shape of an airship and consist of: MOAB (Massive Ormary Air Blimp), BFB (Brutal Flying Behemoth), DDT (Dark Airship Titan), SOMG (Tseppelin Mighy Gargantuaness) and BAD (Big Airship of Destiny). The tougher versions of most bloon types contain a number of certain weaker ones. In later versions of the game, regular bloons have sometimes special characteristics such as camouflage (which most towers can't detect), regrowth (the ability for bloons to slowly grow back to their original and fortified (which doubles the health of the most complex complex that resist certain types of towers. With each level, the intensity of the bloon waves increases proportionally. The Towers are the main defensive utility in the Bloons TD series. Each tower has its own unique purpose, power and use, with some of them being powerful against specific bloons, but unable to target others effectively. Each tower can be upgraded to increase power and other features by spending in-game currency, known simply as money, which is earned by flapping bloons and at the end of each round. In Bloons TD 4 and beyond, some towers such as banana farms can be placed to produce extra money during the round (end round in Bloons TD 4). In later games, there are several levels of difficulty, for example, BTD5 has four levels of complexity and Bloons Monkey City has five levels. The greater the difficulty the player plays, the fewer lives they have and the greater the cost of each tower and upgrade. There are also different types of cards rated by complexity; In general, there are more types of cards in new games. The main recordings are a screenshot of the original Bloons Tower Defense. There are currently six released movable games in the Bloons TD series, in addition to various add-ons and side effects such as Bloons TD 4 Expansion and Bloons Monkey City. The newest release, Bloons TD 6, was released on June 14, 2018. The series was renamed from Bloons Tower Defense to Bloons TD in 2009 due to a violation of the Trademark Tower Defense: Lost Earth, owned by Com2uS. Bloons Tower Defense and Bloons Tower Defense 2 Bloons Tower Defense is the first BTD game released in mid-2007 as a free flash browser game. In the game, players had to defend themselves against colored thugs with monkeys, dart throwers and other towers located around the map. When strong bloons popped they release weaker ones until finally completely popping. If all lives are lost, the game is over. If all the waves are passed, the player will win the game. Bloons Tower Defense 2 was released shortly thereafter in late 2007, adding new towers, several map options, new bloons, and an option for the complexity of the game. The Bloons TD 3 Screenshot of the Bloons TD 3 browser from 2012 was released on September 5, 2008, a few months after the release of Bloons Tower Defense 2, named differently due to a trademark dispute with Com2uS. As in the second game, new towers, bluns and maps were added. The game-based version was released for iOS under the name Bloons TD; October 3, 2009 in the iOS App Store. This version had additional maps stylized as snow and beach themes, and included the achievements of OpenFeint. The game included five packets of cards containing a total of 15 different levels to play, with packages unlocked by completing previous levels. This version of the game was also released for PlayStation Portable in 2010. Another version just called Bloons Bloons was released for DSiWare in 2011, containing 50 rounds to complete. Bloons TD 4 Screenshot Bloons TD 4 Bloons TD 4 was released on October 26, 2009 as an online freemium game with its own version of iOS, released on December 7, 2010, developed in conjunction with Digital Goldfish. The gameplay has undergone changes, including a graphic update, the ability to save the current game, and the introduction of an unlock-based alignment system. The tower upgrade system received various changes, including an increase in the number of upgrades to the tower, and new maps and game modes were added. The iPhone and iPad versions of this name have been purchased more than a million times. The game was also released as DSiWare in 2012. Bloons TD 5 Screenshot of Bloons TD 5 iOS Original (Flash and Freemium) Bloons TD 5 was released on December 13, 2011. A patented version of BTD5 was released on iOS worldwide on November 15, 2012 for iPhone and iPod with improved graphics and additional updates, tracks, towers and bloon types. It was released on Steam on November 19, 2014. Bloons TD 5 Deluxe was released on January 27, 2012, which sets before the player a certain goal that the player can achieve to be rewarded more in the game by currency. In addition, with a new update to the mobile version of BTD5, a new tower was added under the name Monkey Sub. Later, on July 23, 2015, the submarine was added to the online version. This game also has unlimited round free game mode that can have from MOABs to zombies. The Steam/Mobile version has two special mode bosses, Dreadblood and Blastapopoulos. iOS, Android and Steam have 15 languages: English, Arabic, Danish, Finnish, French, German, Italian, Japanese, Korean, Norwegian, Portuguese, Russian, Spanish, Swedish and Turkish. On March 3, 2017, it was released for Microsoft's Xbox One, later released for PlayStation 4 on May 9, 2017, and Nintendo Switch on June 13, 2018, all costing \$14.99. Bloons TD 6 This section needs additional quotes to check. Please help improve this article by adding quotes to reliable sources. Non-sources of materials can be challenged and removed. (August 2020) (Learn how and when to delete this template message) Bloons TD 6Developer (s)Ninja KiwiPublisher (s)Ninja KiwiSeriesBloons Tower DefenseEngineering (s)Android, iOS, Microsoft Windows, macOS, Linux-ReleaseAndroid, iOS:WW: June 14, 2018Steam:WW: December 17, 2018Genre (s)Tower DefenseMode (s)Single-player, multiplayer Bloons TD 6 is the newest game in the main Bloons TD series. After it was announced on March 28, 2017 on PRLog, it was released for the iOS App Store and Google Play on June 14, 2018. Steam was released on December 17, 2018. Unlike all previous games, the Bloons TD 6 has no flash analogue on the Ninja Kiwi site. Along with 3D graphics, the new features added include three new types of bloon, with unique properties such as immunity to magic and fire, extra health, or immunity to slowing down and rolling back. Some maps contain obstacles that block the view of some towers. Some obstacles can be eliminated by paying the amount of in-game money. As in previous games, players start with a certain amount of starting cash and lives and are required to build towers to defeat the established wave of bloons for the round. In the game the cash is earned for every cotton popped up. People get lost when the blues reach the exit. Additional towers and upgrades can be bought to further help the defense against more complex rounds. Some towers can directly attack bloons, while others slow down bloons, support nearby towers, or generate in-game currency. Special towers, known as Heroes, are automatically upgraded without entering the player, or can be upgraded for large sums of money, although only one hero can be placed per game pre-selected by the player. Eleven heroes are currently in the 22.0 update. If you play at a co-op game, each player can put down one Hero. Special game modes can be unlocked for the card when completed on a certain difficulty of the game. Each represents changes to gameplay, such as limiting certain tower types, increasing towers and updating prices, reducing or eliminating external revenue, or spawning strong wave bloons. Some modes of play start at later rounds or increase the round needed to beat the game. Players can also play dailly calls created by game users with special rules not present in regular games. Winning most games earns a special currency in the game called Monkey Money. It can be used to purchase forces that are either temporary pulses or unique towers that cannot be upgraded. Some heroes are bought with Monkey Money, and the characters have unique cosmetic skins that can be purchased. Another currency, called Monkey Knowledge Points, is used with Monkey Money to unlock special tower boosts. Trophies are the newest realized currency. They have benefited from the completion of the race or odyssey game modes and can be spent on buying various cosmetics such as hero animations or profile pictures. Spin-off Aside from the main series, Ninja Kiwi has made several BTD games that include the main gameplay of BTD, but not the moderate sequels. Bloons TD Battles Bloons TD Battles was released on December 12, 2012, and then on Android and iOS platforms between November 5 and November 6, 2013, respectively. On April 20, 2016, it was released on Steam as a portable version. The gameplay is similar to the TD 5 bloons, but two players compete against each other in one of the three game modes. In attack mode, each player usually passes levels that are more difficult. However, players also get the opportunity to purchase additional bloons by sending them to the enemy, suppressing them. In defense mode, players play a natural game, the screen is split vertically. Players can spend money to increase the increase in Card Fights mode; players choose from a selection of cards that can be used in their games. The cards have two functions: Sending bloons to an enemy player who, like in attack mode, will give the player who sends bloons income, and placing down the tower. All three goals of the game to outlive the enemy in survival bloon attacks. Using a game skill mapping system, players can automatically match each other. Bloons Monkey City This section relies too much on references to the first source. Please improve this section by adding secondary or tertiary sources. (February 2015) (Learn how and when to delete this template message) Bloons Monkey City was released on November 25, 2013. Like Bloons TD Battles, the main gameplay is similar to BTD5, however, the player must support the city by expanding the city, capturing an infected flea area called blies. One of the important goals of the game is to level the city. Players earn XP for the city by capturing tiles, completing missions or building towers. Earning higher levels with XP provides access to some unique game features like Monkey vs. Monkey, Monkey Knowledge, etc. There is also a game feature known as Monkey vs. Monkey that allows players to fight each other; raids can be launched with the help of the Bloomonium resource. This can be acquired by capturing certain tiles or with Bloomonium generators. If the enemy fails to defend against the raid in a set period of time, the attacker receives urban cash, another resource in the game used to build towers, Bloomstones, premium currency games, and honor a city that has no main purpose in the game other than achievements. One of the main differences between this game and others in the Bloons series is the addition of buildings. Buildings in Bloons Monkey City are necessary for the use and modernization of the towers. Some buildings serve as prerequisites for other buildings, while others are prerequisites for using some bloons in raids. The number of towers a player can use in a game is determined by the number of appropriate type of building a player has. Some buildings unlock new monkeys, while others unlock updates for these monkeys. Other buildings are needed to unlock level four upgrades, camouflage bloom defense, and MOAB-class bloon popping power (God of the Sun and Robo Monkey also require buildings). This game contains 3000 tiles, and a new MOAB-class bloon, which is DDT (or Dark Titan Airship). In mid-2014, Ninja Kiwi released a new mode known as Unlocked Territory, a mini-game that offers bonus rewards, and pits players against each other, all of whom compete to survive most rounds for a long time on a harder-than-usual track. This game was released in browsers, but the port for iOS and Android was released December 2014 and February 18, 2015, respectively. The Steam version was released on April 10, 2020. Bloons Adventure Time TD Bloons Bloons Time TDDeveloper (s)Ninja KiwiPublisher (s)Ninja KiwiSeriesBloons Tower DefenseEngineering (s)Android, iOS, Microsoft Windows, macOS, Linux-ReleaseAndroid, iOS:AU: July 14, 2018SEA: July 14, 2018WW: August 28, 2018Steam:WW: January 16, 2019Genre (s)Tower DefenseMode (s) Single-game Bloons Adventure Time TD is a crossover between the Ninja Kiwi Bloons TD series and cartoon Network's Adventure Time series, which was announced through the International Cartoon Network news site and the Ninja Kiwi blog on March 8, 2018. The soft game was launched on July 14, 2018 in Australia, New York, the Philippines and Singapore on Android and iOS, and then launched internationally. The game features characters from Cartoon Network's Adventure Time such as Finn the Man, Jake the Dog and Princess Bubblegum, as well as new monkey characters like Max, Cassie, and C4 Charlie. The gameplay is similar to other games in the series, with new weapons and the mechanics of the items. There are at least 15 adventures and 50 cards to play in that act as a game stage game. Receiving Aggregate Review score Game Year Metacritic Bloons TD 4 2009 iOS: 69/100 x 48Bloons TD 5 2012 iOS: 79/10049 Bloons TD Battles 2012 iOS: 78/100 La Lore Schoenberg of Wired described the game as fun and exciting, calling it pop culture at its best. In 2012, IGN's Justin Davis described Bloons Tower Defense as one of the best free tower protection games, despite its amateur artwork. He later noted the lack of depth in the first round and that the sequel improved that. IGN editor Damon Hatfield said he believed the Bloons TD 3 was able to withstand the crowded game by having enough basic game mechanics and adding an individual twist. The iOS version of the game received mixed reviews, with some authors praising the unique towers and good gameplay, although the user interface, controls and lack of leaders were criticized. The DS version received a similar reception, with Lucas Thomas of IGN describing it as a pretty good take on the good old Bloons TD. Kristian Reid of Eurogamer gave a version of PSP 8/10, describing it as transfiking, although he said the music appeared to have been designed to drive you crazy. Game'bo editor Jim Squires gave Bloons TD 4 a 3.5/5 rating, praising it on well-designed maps and towers and for a lot of content, but he criticized the game for not bringing anything new to the genre. GamePro editor Ryan Rigney gave the Bloons TD 4 a 2/5 rating, saying he had the same Bloons Tower Defense gameplay as the previous titles, and the screen eventually gets so hectic that it's no fun to play; a question that many other reviews have also responded to negatively. The Bloons TD 5 was received in the same way as its previous version, with reviewers positively commenting on the number of maps, towers and levels, but criticizing the lack of innovations in the tower defense genre and performance problems at higher levels. Both the Bloons TD 4 and the Bloons TD 5 are among the top 10 paid iPhone apps in the iOS App Store, with the Bloons TD 4 selling more than 1 million copies. Bloons TD remained in the top 100 apps for at least 3 months, and the Bloons TD 5 was the 8th most purchased app for the iPhone in 2013. In total, the series of games has been played more than 1 billion times through the Internet and mobile devices. The Bloons TD 6 was praised for its extended gameplay selection, but was also criticized for its lack of bread, despite an increase in the number of unique elements in the game. Links to Bloons TD.
